Team Feedback Requirement

- Due via email the same day
  - Subject: Team X feedback
  - Nothing else inside the email
  - After anonymizing, will be distributed to teams

- Process
  - Take brief notes while listening to presentations
  - Record overall impressions at the end for example:
    - Did team make its case?
    - Did you agree with the conclusion?
    - Did they miss any important points?
    - Was the presentation engaging and easy to follow?

Feedback Example

To: ehenderson@boisestate.edu

Subject: Team X feedback

- Intro:
  - Nice visuals
  - Seemed to get lost half way
  - strategy makes sense
- Jane
  - Mic issues – difficult to hear
  - What about environmental impact?
  - Categorical Imperative?
- Conclusion
  - Does not fit with strategy – did you attend the meetings?
  - Nice examples
- Overall
  - Team X did a good job laying out the issue but I don't feel they made a very strong case for their conclusion. For example, although some monkeys attack tourists in densely populated cities other monkeys mind their own business. So I don't necessarily agree we need to conscript gorillas to police monkeys.

    Also, some of the speakers seemed to stray from the central thesis and this detracted from the overall message. The technical aspects were good with nice visuals and some interesting examples of their topic.
